Rick,

Thanks for the quick response, and I'm glad that we happened to run into each other at the All Hands meeting this morning. I do agree with Roger that you're the right R3 person to do this. Region 5 is also going thru a similar realignment to ours, so they might have a new DD in their Superfund office too. Just giving you a heads up that some of the DD's might be brand new, just in case that changes some of the background/history segment of the presentation.

Elisabeth,

Depending on what time of the day on the 26th, I could do it. I can cover the Chemours facility. Something more interesting to CERCLA DD's might be our coordinated work with our CERCLA regional program group on three DOD facilities where we issued a SDWA order and we've coordinated with CERCLA folks on longer term remediation, where we've asked for some groundwater treatment to control plume spread within the SDWA order and CERCLA is working the same, longer term areas under FFA's with DOD.

Rick

Hi Rick,

Would you be amenable to providing a 5 minute presentation to the Superfund DDs on the Parkersburg Washington Works facility? My OD, Cyndy Mackey, would like a couple of regions to provide a summary of a

PFAS site so the other SF DDs can see how some regions are using various authorities to address PFAS contamination. More explanation is below.

Thanks, Elisabeth

Elisabeth,

Sorry I intended to tell you that Rick Rogers, the Regional POC for PFAS is actually going to do that. Also remember Karen isn't the right person (Enforcement Division Director), you have to contact Paul Leonard, Acting Division Director in Superfund.

Hi Roger,

Just wanted to let you know that my DD will be contacting Karen M about you participating in the upcoming Superfund DD VTC meeting on 3/26. My office director, Cyndy Mackey, would like a couple of regions to talk about their experiences in addressing PFAS contamination. Region 1 will discuss a federal facility; Region 4 will discuss the Chemours facility in Fayetteville, NC which is dealing with GenX and PFOA contamination; and, Region 5 will discuss a RCRA site.

The Parkersburg facility has several interesting aspects – joint CD with Reg 3 and 5, amended state permit to include PFOA, etc. Are you okay with presenting information for about 5 minutes? Cyndy is hoping to highlight the work regions are already doing as well as to demonstrate to those DDs who haven't addressed PFAS contamination that there are tools outside of CERCLA to address PFAS, etc.

Thanks, Elisabeth
